DESCRIPTION

If you're looking to make a custom cable with any two of our HDMI adapters, then you'll need to have these flex cables handy! Making custom HDMI cables has never been easier. Just grab one of these cables, then swap and switch any of the HDMI adapters on each end using the flex cable clips. There are options a-plenty!

This is the **100 cm** (~40 inches) version.

The two required HDMI adapters are not included! Check out all of the options we have in the shop to craft your very own custom cable.

We tested out these DIY cable kits with a Raspberry Pi at 1080P and they worked great but note that they are not going to be as durable or shielded as ready-made cables.
