Round Wash-Away Component Spacers

The Popular Diss-O-Pad Spacer series of Wash-Away Spacers provide for accurate positioning of through-hole electronic components on PCBs then dissolve in hot or warm running water without a trace of residue. Circular water soluble spacers provide a problem solving approach to control production uniformity through the soldering process while eliminating scrap and rejects due to improper component placement or contaminant entrapment. Manufactured from organic materials, Wash-Away Spacers are an ecological solution to improved production yield with over 200 styles available from stock.
