- Unless stated otherwise all electrical values apply at an ambient temperature of 25 °C ± 3 °C, at normal atmospheric conditions

STORAGE AND OPERATION RECOMMENDATIONS

The molding resin of the molding type ceramic capacitor does not form a perfect seal, avoid corrosive gas and direct sunlight, and use (storage) in the condition without moisture condensation.

This series is declared to MSL 2a.

Solder the enclosed capacitors within 168 h after opening the moisture-proof package.

After opening, store it in the packing condition at the time of delivery or in a similar state.

Temperature: 10 °C to 30 °C

Humidity: 60 % max.

If it has been more than 4 weeks since opening, or if the 10 % display of the HIC (humidity indicator card) is pink, perform baking according to J-STD-033B0.1.
